## ONE STEP FURTHER

The Free Minds building has been designed to consolidate the various workshops and offices that the Bellapart group have occupied in recent years.

It is a common place for a shared philosophy, that of investigation, innovation and quality. These are values that have provided us the energy to move forward uninterrupted during the last 75 years of the company.

The new headquarters of the Bellapart group is simple yet bright where wellbeing and efficiency come together in natural harmony. The continuity of the business plan is an

essential objective for us. As in all of life, there have been great moments over the years of our business experience, and indeed some not so great. However, it is continuity that has always provided us with a huge incentive and has led to the most fertile ideas and the best results.

With the aim of ensuring that continuity of excellence, Xavier Fito has recently been appointed as General Manager of the Bellapart Group. Xavier has previously proved very successful for the company as Commercial Director with over 15 years of experience running the Bellapart sales team.

He has recently concluded his studies in Leadership Development and is now ready to begin his new role which he will undertake with vision and great rigour.

The satisfaction of our clients and employees along with open and honest dialogue are how we will continue to tread a confident and progressive path.

Francesc Arbós Bellapart will continue to chair the group and will actively work to ensure that the Free Minds spirit accompanies us with our work.
